

Blood Borne Viruses

Free and confidential testing for Hepatitis B, Hepatitis C and HIV.

Get tested here today - it's better to know. Just a small finger prick.

Should you have a test?

Yes, if you have ever:

- Had unprotected sex.
- Injected drugs, even if it was a long time ago or only once.
- Had a tattoo or piercing in conditions that were not sterile.
- Been in prison.
- Had medical treatment abroad.
- Received a blood transfusion or blood products before 1991.
